

## **Webmedx, Inc. Acquires Assets of Rodeer Systems, Inc.**

Health Care Information Technology Provider Expands Outsourcing Services

**PITTSBURGH, PA - March 1, 2002** — Webmedx, Inc., a privately held health care information technology provider, announced today that it has completed its acquisition of selected assets of Atlanta based Rodeer Systems, Inc., a leading provider of medical information and transcription services to hospitals, multi-specialty clinics and research facilities. This acquisition provides Webmedx with additional resources to continue the expansion of outsourcing services to its customers. In combination with the Webmedx integrated digital dictation, transcription and electronic medical record solutions, these services represent the most advanced Web-based technology available, allowing healthcare providers to significantly reduce the complexity and cost of creating, managing, accessing and distributing clinical information.

Dave Nelson, Chief Executive Officer of Webmedx commented, "Webmedx is in the business of outsourcing critical clinical workflow applications, as well as report production and access technology, including transcription. This acquisition enhances our ability to meet growing customer demand for these services."

### **[About Webmedx, Inc.™](#)**
